

New Jersey's Four-Tiered Approach to Volunteer Monitoring

Tier	Data Users	Data Use	Quality Needed
A. Environmental Education	<ul style="list-style-type: none"> • Participants • Students 	<ul style="list-style-type: none"> • Promote stewardship • Educational purposes • Raise their level of understanding of watershed ecology 	<ul style="list-style-type: none"> • Low level of rigor but use sound science • Wide variety of study designs are acceptable • Quality assurance recommended for educational purposes
B. Stewardship	<ul style="list-style-type: none"> • Participants • Watershed residents • Local decision makers 	<ul style="list-style-type: none"> • Gain understanding of existing conditions and changes over time • Screen for and identify problems and positive attributes 	<ul style="list-style-type: none"> • Low/medium level of rigor • Variety of study designs are acceptable • Internal quality assurance desirable • Training required
C. Community/ Watershed Assessment	<ul style="list-style-type: none"> • Participants • Local decision makers • Watershed associations • Environmental Organizations • Possibly DEP 	<ul style="list-style-type: none"> • Assess current conditions • Track trends • Source track down of nonpoint source pollution 	<ul style="list-style-type: none"> • Medium level of rigor • Data needs to reliably detect changes over time and space • Narrower range of protocols acceptable • Internal and external quality assurance • QAPP annually reviewed • Training and annually “refresher” training recommended
D. Indicators	<ul style="list-style-type: none"> • Participants • State decision makers, DEP • Local decision makers • Watershed associations • Environmental Organizations 	<ul style="list-style-type: none"> • Assess current conditions and impairments • Supplement agency data collection • Research • Evaluate best management practices 	<ul style="list-style-type: none"> • High level of rigor • Study designs and methods need to be equivalent and recognized by agencies using the data • Training and annual “refresher” training required • QAPP required • Annual approval of QAPP required • Audit by program manager and potential data users
